TRIAL
the benefits.

Our Kascade solutions provide complete washroom support – from initial audits to full implementation and ongoing assistance. At Knighton, we partner with you to ensure your washroom operates efficiently, using sustainable, cost-effective products that are better for the environment.

DISCOVER the challenges.

We begin by visiting your premises, walking through your washrooms, and talking with your team. This helps us uncover the challenges that cause frustration or unnecessary cost, from unreliable dispensers to inconsistent stock management. By taking the time to understand your site properly, we can identify what really needs to change and where the biggest gains can be made.

DESIGN a solution.

We partner with you to meet your goals—whether that's reducing waste, simplifying ordering, improving hygiene standards, or creating uniformity across multiple sites. Once we understand your needs, we'll design a plan tailored to you. Our recommendations are practical, cost-conscious, and supported by the systems schools and Trusts already use, all backed by over 20 years of experience in education environments.

TRIAL the benefits.

Before you commit, we want you to experience Kascade first-hand. We offer a 28-day free trial for a range of dispensers, including full installation and consumables at no cost. It's a simple way to see the difference in performance, consistency, and reliability without any risk. You'll know exactly what to expect before making a decision.

INSTALL with confidence.

After your trial, if the results meet your expectations, we'll handle a smooth rollout across your estate. If something isn't quite right, we'll adapt the approach until it fits. Either way, you stay fully informed, supported, and in control throughout. The result is a washroom system that works as it should, dependable, sustainable, and built around your priorities.
