

Timberley Academy in Birmingham has put a stop to drain blockages and daily refilling with Knighton Janitorial system dispensers.

An end to drain blockages and daily refilling.

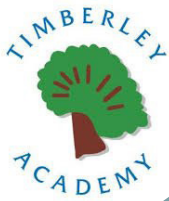

## CHALLENGE

Prior to 2021 Timberley Academy was using washroom dispensers that didn't provide any control over use and consumption. The students would use an excessive amount of toilet paper which ended up blocking the drains and going all over the floor. They would also take far too many (up to half a packet sometimes) hand towels in one go, meaning the washrooms needed refilling and cleaning several times a day.

## SOLUTION

**76**

k-One Centrepull Toilet  
Tissue Dispensers

**40**

k-One Mechanical Hands-Free  
Towel Dispensers

**6**

k-One Foam  
Soap Dispensers

The idea of switching to dispensers that allow a single sheet to be dispensed at a time, coupled with the option of a two-week trial, seemed ideal for the school. At the end of the trial period positive feedback was received from staff and students and the decision made to replace all dispensers site wide.

“Before the Knighton dispensers were fitted the drains would block every 6 months or so and I would end up removing huge amounts of toilet roll to clear them. We were also spending a fortune on paper towels and constantly refilling.

Drain blockages have now stopped, I only need to refill the paper towel dispensers every other day and I'm also spending much less time cleaning paper off washroom floors!

After the success of the washroom upgrades and a recommendation from another local school, we now use Knighton for 99% of all our Janitorial products.
