

# The Knighton Sustainable Washroom Guide

High-traffic washrooms now need to be Green as well as Clean. This guide can show you how.

# Cleaning

## Toilets, Sinks, Tiles and Urinals

### EC9 e:dose Super Concentrated Washroom Cleaner (Code CH308A)

**Green** - 1 litre makes 100 reusable spray bottles or 50 buckets of solution. Compared with using 'ready-to-use' trigger spray bottles, this can reduce chemical use by up to 50 % and plastic waste by up to 98 %.

**Clean** - effective against bacteria and enveloped viruses, including coronavirus (EN 1276 bactericidal test, EN 14476 virucidal suspension test and EN 16777 virucidal surface test).

## Hard Surfaces and Floors

### EC6 e:dose Super Concentrated All-Purpose Hard Surface Cleaner (Code CH309)

**Green** - 1 litre makes up to 100 reusable spray bottles or 50 buckets of solution. Compared with using 'ready-to-use' disposable spray bottles, this can reduce chemical use by up to 50 % and plastic waste by up to 98 %.

**Clean** - all purpose neutral formulation for daily general cleaning of all washable hard surfaces, including mirrors and floors (damp mopping or spray cleaning with a high speed floor machine).

### 100% Recycled Wet Floor Sign (Code FC052)

**Green** - made from 100 % recycled plastic.

**Clean** - allows efficient cleaning with patented non-tip design.

### Mop Refill System (Code FC1389)

**Green** - reusable mop socket allows mop head refills to be used when needed, reducing plastic waste.

**Clean** - colour coded sockets and three refill choices: The Big White (made from non-woven spun lace), yarn or twine.

# Paper

## Toilet Tissue Dispenser Systems

### k-One Toilet Tissue Dispenser (Code WH900)

**Green** - controlled, measured consumption can reduce paper waste by up to 50 %. Used with EU Ecolabel k-One toilet tissue.

**Clean** - the user only needs to touch the sheet they use and not the dispenser or multiple sheets, eliminating cross-contamination and improving hygiene.

### North Shore Orbit Toilet Tissue Dispenser (Code WH1006)

**Green** - tension controlled dispensing and a system that allows access to just one roll at a time ensures minimal overuse and waste. Used with the North Shore toilet tissue it has an industry beating tissue breakdown time.

**Clean** - a mighty 4 roll capacity ensuring high-traffic washrooms never run out. The rolls are kept locked, clean, hygienic and protected.

## Hand Towel Dispenser Systems

### Satino Centrefeed Dispenser Plus (Code WH1251)

**Green** - can reduce waste by up to 30 % with dispensing controlled to one sheet at a time.

**Clean** - the user only needs to touch the sheet they use and not the dispenser or multiple sheets, eliminating cross-contamination and improving hygiene.

### k-One Mechanical Hands Free Towel Dispenser (Code WH752)

**Green** - the sheets are an optimal size of just 23.5cm in length and dispensing is controlled to 1 sheet at a time, ensuring efficient usage and minimal waste.

**Clean** - the user only needs to touch the sheet they use and not the dispenser or multiple sheets, eliminating cross-contamination and improving hygiene.

# Handcare

9

## Hand Soap Dispenser Systems

### k-One Foam Soap Dispenser (Code WH902)

**Green** - compared to a bulk refill system, a cartridge refill system can reduce plastic waste by up to 5 times, and ensure optimum product use with 2,500 measured doses versus around 800 unmeasured from the bulk refill dispenser.

**Clean** - new sterile pump fitted with each cartridge ensures no bacteria build up or cross-contamination.

10

## Hand Sanitiser Dispenser Systems

### k-San Automatic Cartridge Refill Dispenser (Code WH1105)

**Green** - compared to a bulk refill system, a cartridge refill system can reduce plastic waste by up to 5 times, and ensure optimum product use with 2,500 measured doses versus around 800 unmeasured from the bulk refill dispenser.

**Clean** - touch-free automatic dispensing and new sterile pump fitted with each cartridge, ensures no bacteria build up or cross-contamination.
