

DoningtonPark

Internationally renowned race circuit, Donington Park, achieved substantial cost and time savings by taking a free washroom dispenser trial.

Free trial

leads to substantial cost
and time savings

CHALLENGE

Previously the venue was using a number of different toilet tissue dispensers throughout the site, but realised that the cost and time needed to manage the high footfall washrooms could be reduced by standardising everything. Taking advantage of Knighton's free dispenser trials, the venue decided to test 30 x k-One Centrepull Toilet Tissue Dispensers, a system dispenser that is proven to reduce consumption by up to 50% with controlled dispensing to a single sheet at a time.

DoningtonPark

SOLUTION

The trial required no investment from the venue in terms of budget, time or risk but it allowed them to see the potential cost and time savings before committing to a site-wide installation of 250 dispensers, carried out by the Knighton installation team.

30

k-One Centrepull Toilet
Tissue Dispensers trialled

250

k-One Centrepull Toilet Tissue
Dispensers fitted site-wide
throughout 40 washrooms

We at Donington Park continue to make significant savings both on cost and time, whilst delivering a more pleasant experience for the customer. I would also like to add that the customer service we receive is outstanding from your whole team at Knighton.
